Charul · Sanika Girase · Sharvari Kulkarni

The Problem

$140 Billion

in federal benefits go unclaimed every year in the United States, leaving millions of vulnerable women and families without essential support.
Source: link health

Fragmented Systems

Women must navigate 20+ separate agencies and websites to find what they qualify for
Source: Migration Policy Institute, 2025 · CBPP, 2024

5.9 Million women

eligible for WIC (nutrition support for pregnant women, new mothers & young children) do not receive it. Only 51% of eligible women participate - coverage has fallen since 2016.
Source: USDA Food & Nutrition Service, WIC Eligibility Estimates 2021

Who is affected most?

- Single mothers & female-headed households
- Pregnant women
- Women without a college degree
- Women in rural areas
- Language & literacy barriers

Our Solution

An intelligent eligibility engine that matches women with federal, state, and local government benefits — through a simple form or just their voice.

Smart Form Input

Answer a few questions about your household, income, and situation. The system handles the rest.

Voice-Powered Access

Speak naturally about your situation using the microphone. Our NLU parser extracts your profile automatically.

Multi-Agent Engine

Specialized agents for benefits, healthcare, and education analyze eligibility across 50+ programs simultaneously.

Key Features

Eligibility Matching

Rule-based engine with FPL (Federal Poverty Level) calculations across 50+ federal, state, and county programs

Personalized Reasons

Explains why you qualify, required documents, and how to apply for each program

Contact Information

Direct customer care phone numbers, hours, and website links for every matched program

Confidence Scoring

Results ranked by eligibility confidence — high, medium, and possible — with clear indicators

Admin Portal

Government officials can add, edit, and manage schemes with full CRUD and analytics dashboard

Multi-Level Coverage

Federal programs, state-specific benefits (TX, CA, MA, NY, FL+), and county-level assistance

Technology Stack

Frontend

Streamlit | Custom CSS | HTML/JS Components

Backend

Python | LangGraph | Pydantic Models

AI/NLP

LLM Integration (Ollama/LLaMA) | NLU Parser | Rule Engine

Data

JSON Scheme Database | FPL Calculator | CRUD API

Voice

Web Speech API | Browser Microphone | Real-time Transcription

Admin

Government Portal | Scheme Management | Analytics Dashboard

Live Demo

Working Prototype Walkthrough

1. Open the Citizen Portal — dark-themed, government-style UI
2. Fill out the eligibility form: state, income, household, circumstances
3. Click 'Check My Eligibility' to run the multi-agent analysis
4. View matched programs with reasons, documents needed, and contact info
5. Switch to Voice mode — speak your situation, get the same results
6. Open the Admin Portal — manage schemes, view analytics

Future Roadmap & Scalability

Phase 1

Next 3 Months

- Expand to all 50 states
- Add multilingual support (Spanish, Mandarin, Vietnamese, Hindi)
- Import Schemes using CSV
- Integrate with benefits.gov API

Phase 2

6-12 Months

- Pre-filled application forms
- Document upload and verification
- SMS/WhatsApp notification alerts

Phase 3

12+ Months

- Partnership with state agencies
- Real-time eligibility status tracking
- Mobile app launch (iOS/Android)

Thank You
